

Syllabus: AI Tools for Product Owners and Project Managers Training

Master relevant artificial intelligence tools for the daily missions of POs and PMs.

 Information	Details
 Duration	2 days
 Audience	Product Owners, Project Managers, Product Project Managers
 Prerequisites	No specific technical prerequisites
 Contact	Philippe Pary (philippe.pary@astek.net)
 Last Updated	November 25, 2025

Learning Objectives

1.  Understand fundamental AI concepts and their application to the PO/PM role
2.  Use AI to improve deliverable quality (user stories, specifications, documentation)
3.  Optimize cost and time estimation through historical data analysis
4.  Automate repetitive processes to save time
5.  Make informed, AI-assisted decisions
6.  Optimize meetings and documentation with AI tools

Training Structure

Module 1: AI Acculturation for PO/PM

- Fundamental AI concepts (generative, analytical, predictive)
- Overview of AI tools for PO/PM
- Basic prompt engineering principles

Module 2: AI-Assisted Quality, Cost, and Time

- Improving user story and specification quality
- Optimizing estimations and risk analysis
- AI-assisted business cases

Module 3: Automation and Structuring

- Automation tools (Zapier, Make, Power Automate)
- Automated workflow design
- Reporting automation

Module 4: AI-Assisted Decision Making

- Data analysis and insight identification
- Decision frameworks (RICE, SWOT)
- Predictive modeling

Module 5: Meetings and Documentation

- Automatic transcription and synthesis
 - Action item extraction
 - Documentation generation and maintenance
-

Tools Covered

-  ChatGPT,  Claude,  Gemini
 -  GitHub Copilot,  Cursor
 -  Notion AI,  Perplexity
 -  Zapier,  Make
 -  Otter.ai,  Fireflies
 -  Power BI,  Tableau
-

License and Usage

This training content is intended for internal use and for Astek clients.
